

ASHUTOSH KUMAR SOFTWARE DEVELOPER (FULL-STACK CAPABLE)

Gurgaon, Haryana | [+91 85219 75695](tel:+918521975695) | [Portfolio](#) | [Mail](#) | [Linkedin](#) | [Github](#)

EXPERIENCE

Associate Software Developer at Togopool

July 2025 - Present

- Integrated Firebase Cloud Messaging for push notifications with background delivery via service workers.
- Built a bulk-order import tool with a column-mapping UI to align XLSX/CSV headers to schema fields, validating rows before importing 100k+ orders per upload.
- Built real-time driver/vehicle tracking UI with live map updates over WebSockets on a SaaS platform.
- Built a driver operations module with Shift scheduling, role-based access control (R.B.A.C), and Push alerts.
- Delivered a real-time chat system with admin monitoring, backed by WebSocket connection handling.
- Integrated Stripe Payment Gateway for a client booking flow, handling checkout, secure card capture, and confirmation.

Software Developer at 100acress

Oct 2024 - June 2025

- Built pixel-accurate, responsive React interfaces from Figma specs with keyboard navigation and ARIA labeling.
- Built CI/CD pipelines with GitHub Actions deploying to AWS on merge, replacing manual releases.
- Established Git branching and versioned release workflows, standardizing how changes shipped to production.
- Optimized rendering for large datasets with virtualization and Memoization, Cutting load time 45%.
- Restructured client state with a normalized Redux schema and RTK Query, eliminating stale-cache bugs.
- Reduced main-bundle size 20% via code splitting and dynamic imports, improving Time-to-Interactive.

Software Developer - Intern at TawglUp

Jan 2024 - Sep 2024

- Built interactive interview chat with real-time messaging over WebSockets and live client-side updates.
- Implemented structured feedback collection flows, replacing ad-hoc input with a guided conversational UI.
- Added a WebSocket-based notification service for real-time server-to-client updates Interview status.

SKILLS

Frontend	React.js, TypeScript, Redux Toolkit (RTK Query), JavaScript (ES6+), HTML5, CSS3, SCSS, Tailwind CSS, Responsive Design, Web Accessibility (WCAG 2.1)
Testing / Tooling	Jest, React Testing Library, Vite, Webpack, Git, GitHub Actions
Backend	Node.js, Express, MongoDB, SQL, REST APIs
Cloud / DevOps	AWS (EC2, S3), Docker, Firebase, CI/CD
Fundamentals	Data Structures & Algorithms, OOP, C++, C

EDUCATION

Bachelor of Computer Science, J.I.E.T Jodhpur (SGPA : 8.5/10)	2019 - 2023
Intermediate, ST.Karen's Secondary School (CGPA : 8.3/10)	2016 - 2018

PROJECTS

Real Estate Platform — React, Next.js, Node/Express, MongoDB

[\(Live\)](#) | [\(GitHub\)](#)

- Built the frontend for a property-discovery platform: search/filter UI, listing pages, responsive layouts.
- Improved SEO and load performance with server-side rendering, raising Lighthouse scores from 27 to 73.
- Deployed on AWS EC2 behind Nginx, serving 10k+ users with stable performance.

E-commerce Platform — React, Node/Express, MongoDB

[\(GitHub\)](#)

- Built separate buyer and seller flows with JWT authentication and protected routes.
- Implemented cart, product listing, and checkout UI with client-side state management and form validation.
